

PRODUCT SPOTLIGHT**END THE BAD VIBRATIONS • BAR-END WEIGHTS FROM HVMP**

So, sometimes riding your machine is the exact opposite of the old Beach Boy song?

No worries, mate.

HVMP has a wide selection of bar-end weights that will instantly dampen that annoying buzz which filters along your handlebars from the engine.

Unlike many other bars that are more cosmetic than functional, the weights from HVMP work because they actually have weight to them. Their bright stainless steel look is pretty neat as well.

They have bar-end weights for a number of machines with a number of weight sizes available, with prices averaging around \$55, so check out their website for more info.
